

Firestone

WINTERFORCE 2

Designed to deliver strong winter performance for passenger cars/minivans, SUV's, crossovers, and Luxury Performance.

Designed to provide a grip you can rely on even in the harshest of winter conditions

COLD WEATHER COMPOUND

Winterforce 2 tires are built with cold weather compounds and open shoulder slots, allowing for increased traction and handling in snowy, slushy, and icy road conditions

EXTREME WINTER PERFORMANCE

Deep circumferential grooves, wide lateral notches, and open shoulder slots help to channel slush and water away from the contact path which aids in avoiding hydroplaning. Winterforce 2 are branded with the three-peak mountain snowflake symbol.

MAXIMUM GRIP

WINTERFORCE 2 tires provide a grip you can rely on even in the harshest of winter conditions. The full depth tread offers a long-lasting performance season after season. The high sipe density tread allows for thousands of edges to grip in snow and on ice.
