- ✓ EXCELLENT WINTER TRACTION
- ✓ LONG LASTING WINTER TREAD
- ✓ ULTIMATE SNOW & ICE CONFIDENCE
- ✓ GREAT FUEL EFFICIENCY
- ✓ QUIET & COMFORTABLE RIDE

X-ICE[®] SNOW

Designed to deliver strong winter performance for passenger cars/minivans, SUV's, crossovers, and Luxury Performance.

Designed for maximum mobility and safety - not just when your tires are new!

WINTER GRIP MADE TO LAST

Michelin X-Ice Snow tires enhance stopping distances due to the exceptional grip provided by two types of full-depth 3D sipes for an increased claw effect in snow & ice conditions

IMPROVED HYDROPLANING AND SLUSH PERFORMANCE

The X-Ice Snow tires provide better hydroplaning performance than its predecessors. The new aggressive winter tread design has increased void ratio and a v-shaped tread pattern that provides enhanced resistance to snow, slush, and water

EXCELLENCE IN LONGEVITY

On average the Michelin X-Ice Snows last one winter longer than leading competitors. Tread design with interlocking 3D sipes combined with Evergrip technology extends the tires life optimizing contact with road surfaces while braking, cornering, and accelerating
