

Grandtrek SJ6

Designed to provide powerful traction on ice and snow for passenger vehicles, SUVs, & Crossovers

SNOW TRACTION

The Grandtrek SJ6 winter tire has zigzag grooves in the centre that creates twin snow packing pillars, allowing for better traction and braking in snowy road conditions

QUIET RIDE

Grandtrek tires offer optimized groove distribution and tread design, which helps provide even wear. and a quiet ride on dry roads.

ICE TRACTION

Dunlop uses a special glass fibre reinforced tread that helps provide exceptional grip on icy road conditions

DRY TRACTION

Roads can be dry in the winter and Grandtrek tires are designed with an optimized mold shape and ply line that helps provide consistent contact with the road at highway speeds.
